

Outokumpu Mining Oy

Outokumpu is the new market leader. We invented stainless steel and have a century's expertise in the industry. Outokumpu manufactures a wide range of stainless steel products, including hot and cold rolled products, precision strips, tubular and long products as well as tube parts, flanges, and welding products.

Complementing our broad range of products we provide an equally broad selection of services to help you achieve your goals. Our services cover everything from grade selection advice and technical support through to materials testing and cooperation in research and development.

Outokumpu operates in over 40 countries. The company continues to operate in Finland where it has an integrated stainless steel production facility in Tornio and a chrome mine in Kemi. In addition to these, Outokumpu's main office is located in Espoo, with one of its sales offices in Jyväskylä.

The company is in the turnover class of over 1,000 million euros and it employs over 16,000 professionals.
