

# ***Extreme low power chips: Minima***

*Significantly increased battery life for wearables, hearables, IoT and other always-on devices*

## **Uniquely developed and patented semiconductor IP for licensing**

- Over a decade of ultra-low power research from leading Finnish and Californian universities
- Combined with several seasoned semiconductor executives, investors and advisors

## **Up to **10x** Processing Power Reduction → Operate the system always at its energy optimum**

- Energy optimum operation across use cases, computational loads

## **Successful customer design-ins and excellent market feedback**

- Executing a Production Project for a **True Wireless Headset** customer that serves some of the largest brands worldwide for Hearables/TWS
- *“Unique solution and delivery model (...). We would not be able to access the capability without Minima.”*, US Audio SoC customer
- 7B\$ market opportunity

**Seeking 2.5-3.0M€ to fulfil current customer demand and execute our sales funnel**
